

# Nguyen Trung Nghia – Full Stack Software Engineer

Phone: 0799256654 / Email: [nghia250803@gmail.com](mailto:nghia250803@gmail.com) [GitHub](#) [LinkedIn](#)

## SUMMARY

Oracle Certified Professional Java Developer with over 2 years of hands-on experience in building high-performance enterprise systems, specializing in Java programming and web development. Passionate about exploring new technologies and seeking challenging opportunities.

## TECHNICAL SKILLS

**Core Java:** Java 17, OOP, Functional Programming (Streams, Lambda), Collections, Reflection, Multithreading & Concurrency

**Backend:** Java EE, Spring Boot, Spring MVC, Spring Data JPA (Hibernate), MyBatis, Spring Batch, Spring Security (JWT/OAuth2), Spring Cloud

**Distributed Systems & Messaging:** Apache Kafka (Saga Pattern, Partitioning), RabbitMQ, Spring Cloud Stream, Communication (RESTful API, WebSockets, gRPC)

**Design & Architecture:** Microservice Architecture, Clean Code Principles, Design Principles, Design Patterns

**Data & Performance:** Oracle DB (PL/SQL Tuning), PostgreSQL, MySQL, Distributed Caching (Redis), Local Caching (Ehcache), Transaction Management, Query Optimization

**Frontend:** ReactJS, TypeScript, Material UI, Tailwind CSS, TanStack Query, Zustand, AG Grid

**DevOps & Cloud:** Docker, Jenkins CI/CD, AWS (EC2, S3, RDS), Git/GitHub, Zabbix, SonarQube

**Testing:** Unit & Integration Testing (JUnit 5, Mockito)

**Work Management:** Agile/Scrum, Jira

## CERTIFICATIONS

**2025** Oracle Certified Professional: Java SE 17 Developer [\(Check here\)](#)

**2025** English Competency: TOEIC 765/990

## PROFESSIONAL EXPERIENCE

**LG CNS Company (Vietnam) – Full Stack Developer**

**02/2025-Now**

**Project:** WINA System (4 members, 2 front-end, 2 back-end)

- **Description:** An enterprise system as a metadata-driven platforms featuring granular RBAC, high-performance data grids, and internationalization.
- **Technologies:**
  - Front-end: React, TypeScript, MaterialUI, AG Grid
  - Back-end: Spring Boot, JWT, Ehcache, Oracle DB
- **Responsibilities:**
  - Collaborate in requirement analysis to design RESTful API and optimize database schemas
  - Research in-depth code and develop features using Spring Boot and ReactJS
  - Use Oracle DB to manage and maintain more than 100 tables in the database

- Optimize data fetching performance using MyBatis and TanStack Query to enhance user experience

**Project:** Seat Booking App (4 members, 2 front-end, 2 back-end)

- **Description:** A seat booking web app to create and manage seat reservations
- **Technologies:**
  - Front-end: VueJS, Vuex, TypeScript
  - Back-end: Spring Boot, JWT, Transaction, WebSocket, Redis, MySQL, Docker
- **Responsibilities:**
  - Analyze business requirements to design RESTful Api and optimize database schemas
  - Develop backend services using Spring Boot, focusing on transaction integrity and efficient seat-locking mechanism
  - Implement secure authentication and authorization layers using JWT and Spring Security
  - Manage and maintain database with more 10 tables in MySQL, utilizing MyBatis for query tuning and data mapping

**Bitsco Company (Vietnam) – Full Stack Developer**

**04/2024-10/2024**

**Project:** HPU Website (4 member, 3 front-end, 1 back-end)

- **Description:** A web app used by the school library to manage books, documents
- **Technologies:**
  - Back-end: Spring Boot, Spring Security, JPA
  - Front-end: HTML5, CSS3, Bootstrap, jQuery
- **Responsibilities:**
  - Design UX/UI and implement functionalities (both back-end and front-end) based on the requirements of stakeholders
  - Design database schema, use MySQL to manage and maintain more than 20 tables in the database
  - Conduct tests, perform bug fixing, author technical documentation and deploy on production environment

## PERSONAL PROJECT

**Project:** Pomofocus Web App

[\(Check here\)](#)

**12/2025-01/2026**

- **Description:** transform a traditional Pomodoro application into a distributed system supporting thousands of simultaneous users with real-time data analytics capabilities
  - **Microservices:** Divide the system into independent services with Spring Cloud
  - **Event-driven with Kafka:** Use Apache Kafka to fire asynchronous "Session Complete" event
  - **Data Optimization:** Use MyBatis to optimize complex reporting queries and Redis as a distributed cache
  - **Deployment:** Containerize services using Docker and set CI/CD
- **Technologies:** Spring Boot, Spring Cloud, Kafka, Redis, MySQL, MyBatis, ReactJS, Docker.

## ● EDUCATION

**Hanoi University of Industry (Vietnam)**

- Software Engineering Degree grade: Good - GPA 3.4/4
